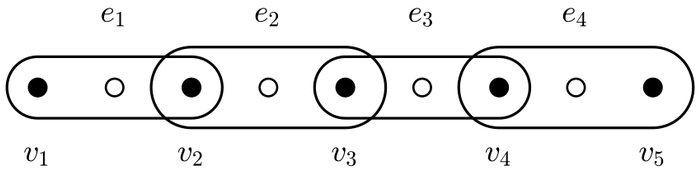
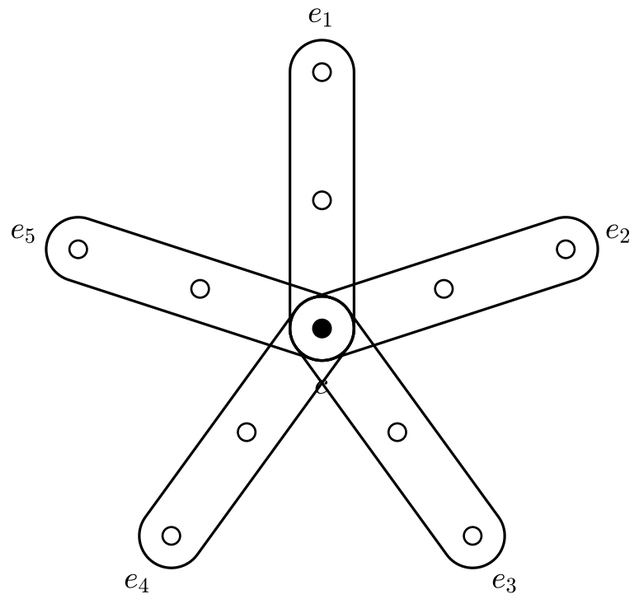
(a) Loose path $P_4^{(3)}$



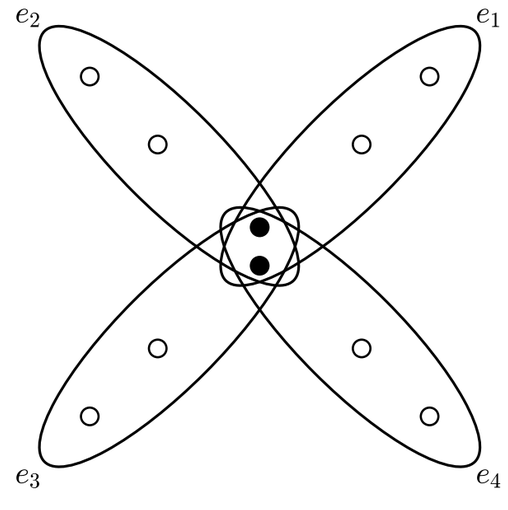
$|V| = n(k-1)+1 = 9,\ |E| = 4$

(b) Hyperstar $S_5^{(3)}$



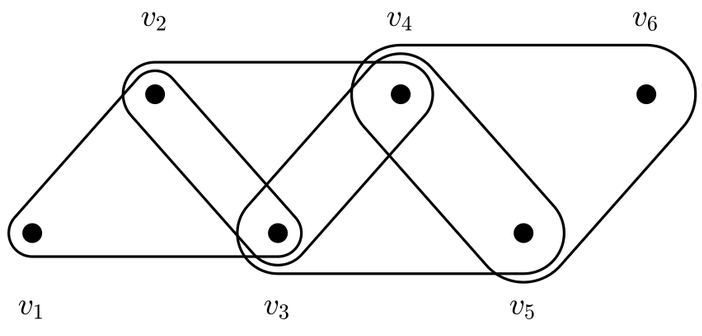
$|V| = n(k-1)+1 = 11,\ |E| = 5$

(c) Sunflower: 4 petals, kernel $\{c_1, c_2\}$



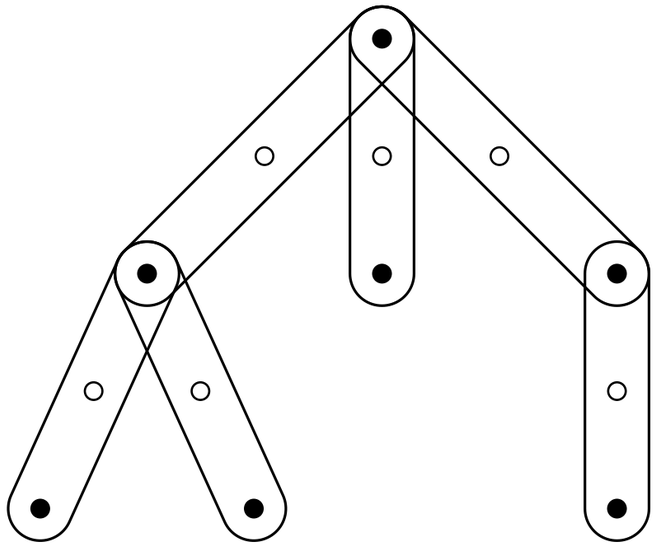
$k = 4,\ e_i \cap e_j = \{c_1, c_2\}\ (i \neq j)$

(d) Tight path (3-uniform, 6 vertices)



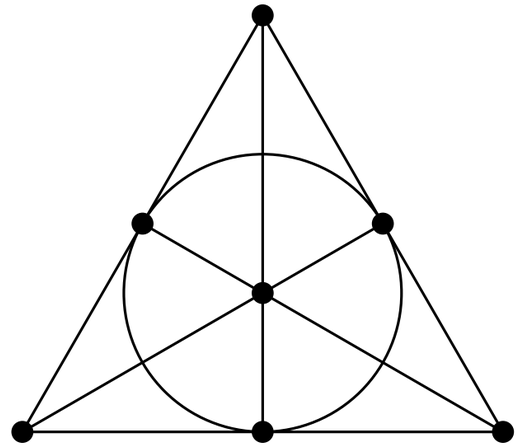
$e_i = \{v_i, v_{i+1}, v_{i+2}\},\ |e_i \cap e_{i+1}| = 2$

(e) Loose hypertree $T^{(3)}$ (power of a tree)



$|V| = |E|(k-1)+1 = 13,\ |E| = 6$

(f) Fano plane



$|V| = |E| = 7$; two edges meet in one vertex
